Part B: Domain Description

Domain

The visualisation domain is community centres in Australia with particular focus community centres in Victoria and Queensland, as only those states have provided accessible datasets and information regarding community centres. The visualisation mainly covers four parts of explaining the community centres, consisting of the everyday services, geographic connections between these communities, participation and access, and volunteers support.

What

- **Dataset Type**: Table
- **Attributes and Attributes Types:**
  - **Ordered quantitative attributes**: Number of sessions, Year, People per week
  - **Categorical attribute**s: Program types, Service types, State, Funded centres per 100,000, Digital services

Who

This visualisation is intended for audiences who are interested in the development of community centres in Australia, especially students or journalists.

Why and How

1) Chart 1: What do Victorians use Neighbourhood Houses for?

- **Why:** To visualise what the local citizens in Victoria use the Neighbourhood Houses Victoria community centre for, with visual highlighting on the top two types of programs that have the most sessions
- **How:**
  - **Idiom:** Bar chart
  - **Marks:** Line
  - **Channels:**
    - Size (length): Longer bar chart indicates more programs being provided
    - Horizontal position: number of sessions
    - Spatial region: types of programs and activities

2) Chart 2: How has program use changed since 2024?

- **Why:** To show the difference in the number of sessions of different programs beong conducted in Australia.
- **How:**
  - **Idiom:** Dumbbell chart
  - **Marks:**
    - **Point**: represent the number of sessions for a program in 2024 and 2025
    - **Line**: represent the difference between 2024 and 2025
  - **Channels:**
    - **Size (length)**: Longer lines indicate higher difference in the number of sessions conducted between the two years
    - **Colour hue**: year
    - **Horizontal position**: number of sessions
    - **Spatial position**: types of programs

3) Chart 3: Which programs are growing — and shrinking?

- **Why:** To show the changes in different programs provision in one year from 2024 to 2025
- **How:**
  - **Idiom:** Diverging bar chart
  - **Marks:** Line
  - **Channels:**
    - **Colour hue**: Changes type

- **Spatial position:** programs type
- **Size (length):** Longer bar indicates greater changes of the program

4) Chart 4: Beyond programs: what services do houses provide?

- **Why:** To compare the percentage of Victorian neighbourhood houses offering different community services across 2024 and 2025, identifying the most and least commonly provided services.
- **How:**
  - **Idiom:** Heatmap
  - **Marks:** N/A
  - **Channels:**
    - **Colour luminance**: darker colour indicates more neighbourhood houses providing a particular service and vice versa
    - **Spatial position:** services provided
    - **Horizontal position:** Year

5) Chart 5: Where are Queensland's neighbourhood centres?

- **Why:** To show the clusters of the different community centres across Queensland by dot. Each dot represents a single neighbourhood centre in Queensland.
- **How:**
  - **Idiom:** Dot map
  - **Marks:** Point
  - **Channels:**
    - Spatial position (latitude and longitude): determines the north-south and east-west position of each neighbourhood centre represented as dot

6) Chart 6: How does availability vary by state?

- **Why:** To show the number of funded community centres per 100,000 residents across five states in Australia
- **How:**
  - **Idiom:** Proportional symbol map
  - **Marks:** Point
  - **Channels:**

- **Size (area)**: larger circle indicates higher number of funded centres per 100,000 residents, and vice versa
- **Spatial position:** to indicate the geographic location of the neighbourhood centres in each state.

7) Chart 7: Where are Queensland's centre hotspots?

- **Why:** To show estimated concentration of the neighbouhood centres located in Queensland, with darker colour indicate the region with higher concentration of centres established, and vice versa.
- **How:**
  - **Idiom:** Choropleth map
  - **Marks:** Area
  - **Channels:**
    - **Colour luminance**: Lighter colour region indicates less centres, while increasing darkness indicate higher concentration of centres
    - **Spatial position:** geographic position of the neighbourhood centres in Queensland

8) Chart 8: How has participation changed over time?

- **Why:** This multi-line chart examines how overall attendance, program-related activity and service referrals have evolved over time.
- **How:**
  - **Idiom:** Line chart
  - **Marks:** Line
  - **Channels:**
    - **Colour hue:** Types of measurement
    - **Horizontal position:** Year
    - **Vertical position:** People per week

9) Chart 9: Which digital services are most common?

- **Why:** To compare how different digital services are commonly offered in Queensland neighbourhood centres in 2025, identifying the most and least widely available digital services.
- **How:**
  - **Idiom:** Lollipop chart
  - **Marks:** Line
  - **Channels:**

- **Horizontal position**: Neighbourhood centres offering service (%)
- **Spatial position:** Types of digital services
- **Size (length):** Longer line of the lollipop chart indicate higher percentage of digital services offered

10) Chart 10: Who visits centres most often?

- **Why:** This chart compares the median number of weekly visitors per neighbourhood centre across four community types in Queensland in 2025.
- **How:**
  - **Idiom:** Dot plot
  - **Marks:** Point
  - **Channels:**
    - **Vertical position:** Types of community centres
    - **Horizontal position:** Median weekly visitors per centre

11) Chart 11: How has emergency relief changed?

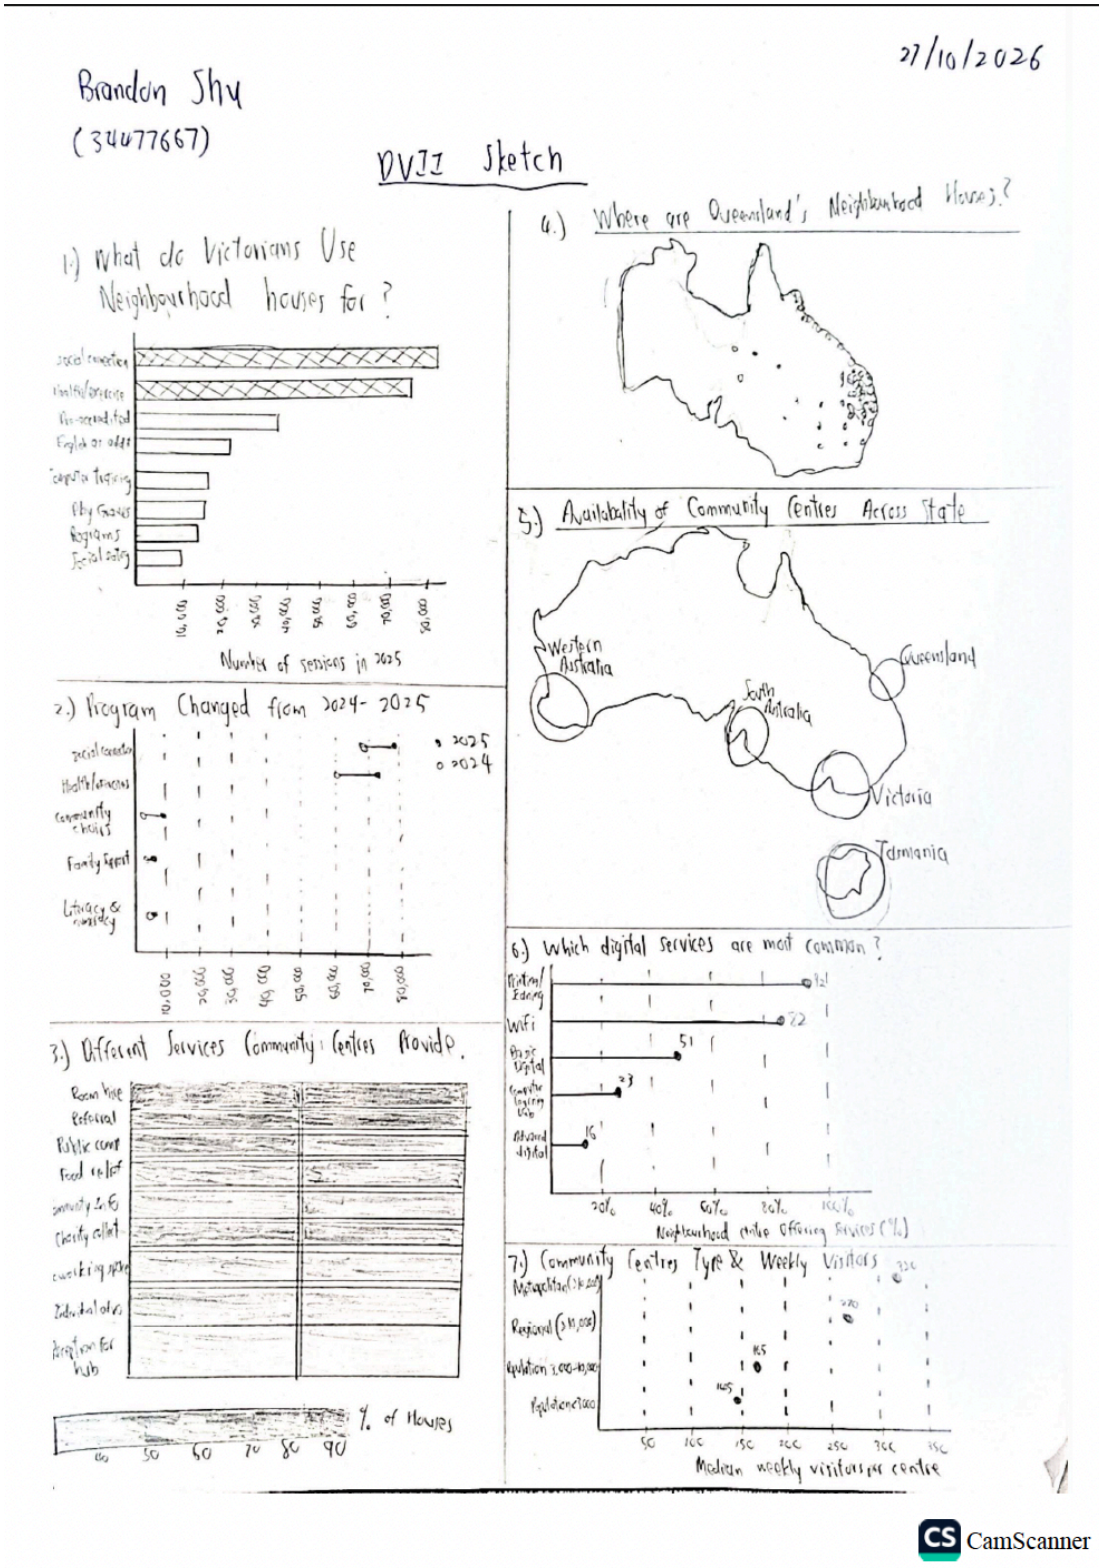

- **Why:** To compare the trend difference between the food relief provision and non-food relief provision by the Queensland community centres
- **How:**
  - **Idiom:** Line chart
  - **Marks:** Line
  - **Channels:**
    - **Colour hue:** Relief type
    - **Vertical position:** Relief provision in percentage
    - **Horizontal position:** Year

12) Chart 12: What do Victorians use Neighbourhood Houses for?

- **Why:** To show the percentage of total volunteers participating in Victoria's community centres, and the relative weekly hours contributed.
- **How:**
  - **Idiom:** Dumbbell chart
  - **Marks:** Line, point
  - **Channels:**
    - **Size (length):** longer line indicates higher percentage increase in
    - **Spatial position:** types of measurement
    - **Horizontal position:** Percentage of increases
